

# STRUCTURE OF COATING OF RUBBER SPONGE MATERIALS FOR MAKING OBJECTS TO BE USED IN WATER

## ABSTRACT

5

A coating of a rubber sponge material for a product to be used in water is provided, which coating is formed by means of applying water-soluble resin paint over a surface of the rubber sponge material such that the rubber sponge material is smooth and water-repellent, and  
10 such that a product made of the rubber sponge material won't absorb water to become heavy after it is immersed in water.
